

Year 6 Homework Challenge – Autumn 1 2019

This term we have decided instead of setting a piece of challenge work weekly we will set a project each term based on our topic. This will run alongside the regular reading, spellings and maths that are set.

As we now have a knowledge based curriculum which focusses on individual subjects, your homework challenge will include an activity which will fit in with the topic you are learning about in that subject.

Using one of the techniques you have learned so far about print-making, create a mono print of your own design.	Draw a map of the UK showing the lines of Longitude, latitude and the Prime Meridian.	Write a story set during WW1.
Design an experiment to show why dissolving sugar in water is a reversible reaction.	Make a small model globe which depicts the lines of longitude, latitude, Tropic of Cancer, Tropic of Capricorn, the Equator, Prime Meridian, Artic circle and the Antarctic circle.	Make a timeline showing the key events of WW1.

The challenge work for Term 3 is due in week beginning **15th October 2019** and during the week there will be time for each child to present their work and for it to be celebrated.

We will send home a book for this work, should your child wish to use, which will be called their '*Challenge book*'. It is completely up to the children to decide how they want to record it. They could use photos, diagrams, drawings or something else! All we ask is that everyone has a go, so they all have something to share at the end of each half-term.

See <http://www.learninglogs.co.uk/> for examples of how other children have recorded their work.

We are hoping the children will really enjoy this and we are looking forward to sharing their outcomes and interests. Please feel free to speak to us should you have any queries about this.

We thank you for your continued support
