

4<sup>th</sup> March 2021.

Dear Parents and Carers,

### **Rapid testing kits for adults without symptoms**

I am writing to inform you that, from 1<sup>st</sup> March 2021, households, childcare and support bubbles of primary age pupils can have access to twice-weekly rapid lateral flow tests.

You can get these tests either through your employer, a rapid lateral flow test site, collection from a test site or order online.

#### **Get a test through your employer**

Your workplace may offer rapid lateral flow testing to you. Contact your employer to find out more.

#### **Take a test at a rapid lateral flow test site**

You can take a rapid lateral flow test at a local site. Testing at these sites is assisted, which means you will swab yourself under the supervision of a trained operator.

You may need to book an appointment.

[Find your nearest rapid lateral flow test site.](#)

#### **Collect test kits**

You can collect 2 packs of home test kits at a local collection point. Each pack contains 7 tests.

Anyone 18 or over can collect.

Most collection points are open from 1.30pm to 7pm. You can check online if the location is open or busy before you go. You do not need to make an appointment.

Do not visit a collection point outside opening hours, as it may be used to test people with coronavirus symptoms outside these times.

[Find your nearest home test kit collection point.](#)

#### **Order home test kits online**

If you cannot get tested at your workplace, or are unable to go to a test site or collect test kits, you can order a home test kit online.

Do not order online if you can get a test through other methods. This frees up home delivery for those who need it most.

## What twice-weekly testing involves

You will be asked to:

- take a test twice a week (every 3 or 4 days apart)
- report every result to NHS Test and Trace on the same day you take the test

[Report your test result online](#) or by calling 119.

If anyone tests positive or gets coronavirus symptoms, they should tell the school and:

- self-isolate immediately
- get a PCR test to confirm the result
- follow the [stay at home guidance for households with possible coronavirus infection](#)

A negative result means the test did not find signs of coronavirus. But this does not guarantee you do not have coronavirus, so you should keep following all [coronavirus advice](#) including:

- regular handwashing
- social distancing
- wearing a face covering where recommended

Kind regards,
